

Humidity Control for Museums and Archive Conservation

Preserve the past and protect the future with DriSteem humidity control systems—ideal for museums, galleries, archives, and any space housing valuable artifacts.

Stable Humidity is Essential for Preservation

- Prevents warping, cracking, and shrinking in wood, paper, and textiles
- Reduces risk of mold growth and biological deterioration
- Protects paintings, sculptures, and rare books from environmental stress
- Ensures long-term stability in exhibit and storage spaces

Relative Humidity Levels and Material Sensitivity Chart

DriSteem: The Clear Choice for Conservation Professionals

- **Consistent and precise humidity regulation:** Advanced technology keeps RH levels stable
- **Customizable solutions:** Scalable systems for exhibit halls and storage rooms
- **Seamless integration:** Works with existing HVAC systems for optimal environmental control
